

STAG ARMS MODEL 5L 6.8 SPC, \$1989

Gun Tests grade: B+

This carbine delivered the best accuracy. But we'd trade every upgrade (save for the MagPul Precision Rifle Stock) for a better trigger.

SPECIFICATIONS

WEBSITE OR EMAIL.....	WWW.STAGARMS.COM

We think the \$255 MagPul PRS (Precision Rifle Stock) was the upgrade of the year. Adjustable for length of pull and height at the cheek piece, this stock enabled us to maintain the best possible index and overcome shortcomings such as a trigger filled with creep and false breaks.

We liked the flip-up sights, but we thought the StagComp Compensator was an absolute best buy at \$8.
