

HIGH STANDARD HSA-15 FLAT-TOP CARBINE HSTX6551 5.56 NATO-223 REM., \$920

GUN TESTS GRADE: B

Light weight and fast handling were this gun's strengths. Shot well with the Federal fodder. Needs a rear sight, so the price should be bumped up \$100 to cover that.

Right: The good part of the plastic handguard: light weight on the front end makes the gun easier to steer in close quarters.

Downsides: There's no place to stick cool stuff, and a little weight makes a gun easier to shoot standing. **Far right:** All of these guns featured telescoping buttstocks, which allow easy adjustment for shooters of practically all sizes.
