

INGLIS HI-POWER W/STOCK 9MM, \$1650

GUN TESTS GRADE: A

Not quite a battered old war relic, the Inglis-made Hi-Power was an interesting study, we thought. Its Parkerizing finish was slightly worn, but intact enough to make this an excellent example of a WWII-era Hi-Power. The stock added to its aura, and we thought the price was reasonable for the package.

SPECIFICATIONS

Overall Length	7.8 in.
Overall Height	5.2 in.
Barrel Length.....	4.6 in.
Sight Radius.....	6.4 in.
Front Strap Height.....	2.4 in.
Back Strap Height	3.3 in.
Weight Unloaded	33.5 oz.
Weight Loaded (15 Rds 147-Gr).....	40.9 oz.

Website.....	www.CollectorsFirearms.com

The Hi-Power fit its lovely walnut stock perfectly. The wood stock was dated 1945. It all worked, all fit, and was a nice package. As the stamping shows, the Inglis company in Canada produced this Hi-Power.

Disassembly of the Hi-Power was simple and easy. The recoil spring was a stout one. We'd replace the magazine's spring if we owned it.

The strap of the Hi-Power was cut in a manner similar to that of the Mauser, but the stock fit was relatively loose. Both guns had lanyard rings.
