

## BERSA FIRESTORM .380 ACP, \$307

Gun Tests grade: A

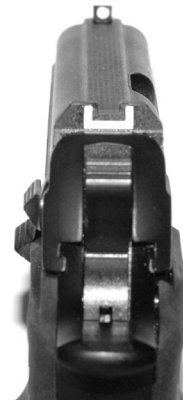

The FireStorm isn't the cleanest design as far as its controls go, but it was an efficient one. Note the roomy trigger guard. This gun worked very well.

### SPECIFICATIONS

GRIP CIRCUMFERENCE (MAX).....	5.4 IN.		
FRAME MATERIAL/FINISH.....	MATTE-BLACK ALUMINUM		
BARREL .....	STEEL		
SLIDE MATERIAL/FINISH.....	MATTE-BLACK STEEL		

The easily seen white outline and dot stand out even in dim light. We wanted a wider rear notch, and that's easily achieved with a file. The sights were mighty close to being right on the money, and were entirely workable as is.

Those front finger grooves are part of the rubber wrap-around grip panels. The lever just above the front of the trigger-guard bow (arrow) is the takedown lever. Rotate it 90 degrees down and the slide can be drawn back far enough to be lifted off the rails and eased forward.
