

PARA ORDNANCE PX1445S GR .45 ACP, \$1129

Gun Tests grade: B-

High capacity is a big plus, but a more precise rear sight would improve overall speed. Also, the cocking serrations needed to be more functional, in our opinion.

SPECIFICATIONS

The rounded profile of the rear sight made alignment difficult, slowing us down in our rapid-action tests. The cocking serrations

The simple coordination of black and stainless steel helped create a most handsome appearance. Note the skeletonized trigger. Grip panels were anchored by stainless steel screws and a notch in the frame.
