

## GUN TESTS REPORT CARD

### **Browning T-Bolt Target/Varmint No. 025176204 22 WMR, \$729**

#### **GUN TESTS GRADE: B+**

Lighter in weight, the T-Bolt felt more compact than the others. This could make it a higher-rated pick for packing across fields. Its trigger was superb, and the ability to work the bolt quickly could be a real bonus when shooting at targets that come and go quickly. This was a fun gun to shoot.

### **Ruger K77/22-VMBZ Target Grey Magnum Varmint Rifle 22 WMR, \$812**

#### **GUN TESTS GRADE: B+**

Looks always count, and the Ruger K77/22-VMBZ has the looks. Its longer barrel increased the power of 22 WMR. The smooth-contour stock could make it an A-rated pick for shooting from a bench. We also liked the three-position safety for convenient handling. The supplied rings and integral scope mount were a real plus. Just add glass.

### **CZ 452 Varmint No. 02041 22 WMR, \$527**

#### **GUN TESTS GRADE: B+**

This is the rimfire rifle for those who don't like rimfire rifles. The CZ offered big-gun feel and sense of operation. An economical pick from the start the steel construction looked like it would last forever. It preferred heavier bullets, so we would like to see how this combination translates to terminal ballistics in the field.
