

# HOWA TALON THUMBHOLE VARMINTER COMBO HWK86101P+ 22-250 REM, \$975

## GUN TESTS GRADE: B

A proven action that would benefit from fine tuning, we'd save the recoil-control stock for bigger calibers. The fore end flexed too much for reliable support, we thought.

### SPECIFICATIONS

Overall Length ..... 44.4 in.  
 Barrel Length/Twist.....24.0 in./1:12

 Made In ..... Japan

Above: The combo package included rings and base as well as a scope. The scope base was a quality product from Evolution Gun Works, (egw-guns.com). The bolt utilized two opposing lugs.

Left: The Limbsaver buttpad went a long way in reducing recoil on its own. Inside the stock we found wrenches and a spare set of rubber inlays for the grip.

Above: The vertical grip stock, which was more than a mere thumbhole, held a lot of appeal, in our view. The buttstock contained a heavy spring that counteracted recoil.
