

ROMANIAN TOKAREV TTC 7.62X25 TOKAREV, \$350

GUN TESTS GRADE: B

For some reason the right grip does not come to the bottom of the frame on the Romanian Tokarev. The gun had been “refurbished,” resulting in somewhat rounded edges. The gun worked perfectly, and was a bit easier to conceal than the other one because of the shorter frame. We thought the add-on safety, just above and behind the trigger, was crude, but it did work.

SPECIFICATIONS

Overall Length	7.7 in.
Overall Height	5.0 in.
Barrel Length	4.4 in.
Sight Radius	6.1 in.
Front Strap Height	2.2 in.
Back Strap Height	3.3 in.
Weight Unloaded	30.2 oz.
Weight Loaded	33.7 oz.
Capacity	8+1
Maximum Width	1.2 in.
Grip Thickness (max)	1.2 in.
Grip Circumference (max)	5.0 in.
Frame	Blued Steel
Barrel	Bare Steel
Slide	Blued Steel
Grip	Black Plastic
Trigger Pull Weight Single Action	6.8 lbs.
Trigger Span Single Action	3.1 in.
Warranty	N/A
Telephone (Toll Free)	(877) 214-9327

Right: The arrows point to the rearmost edges of the notch in the Tokarev’s slide where the slide banged into the frame. This battering caused a burr on both sides, which locked the barrel in place. The slide spring was too weak and needed to be replaced.

Right: The TTC’s guts were similar to those of the Yugoslav version, but this one didn’t have a full-length guide rod for the slide spring. The slides and most of the parts interchanged. The spring clip that locks in the cross pin stuck behind the button of the add-on safety.
