

# GUN TESTS REPORT CARD

## **CZ SP-01 Phantom No. 91158 9mm, \$695** **GUN TESTS GRADE: B**

The CZ was the most accurate of our pistols, and the short double-action first shot simplified the transition to single action. The profile and grip texture of this new polymer frame puts the Phantom ahead of others and should revitalize interest in this classic pistol. Faulty detent on the decock lever dropped its grade a notch.

## **Springfield Armory XDM9211HCSP Bi-Tone 9mm, \$749** **GUN TESTS GRADE: B-**

We think the XDM was the best-looking pistol, and its sight picture was the clearest. Take-up and press of the trigger required more skill than the others. This gun had the feeling of a very strong platform that we think preferred the most powerful rounds.

## **Glock 34 9mm, \$680** **GUN TESTS GRADE: B+**

This is Glock's action-target pistol, and after years of popularity with the Practical Shooting crowd is pretty much perfected. Consistent shot-to-shot performance was easy to achieve.
