

TAURUS 24/7 G2 24/7-G29SS-17 9MM, \$483

GUN TESTS GRADE: A-

Carrying cocked and locked may not have been the intention of this design, but the 24/7 G2 excelled in single-action mode. Ambidextrous controls add value to this bargain-priced pistol.

SPECIFICATIONS

Overall Length.....	7.3 in.

Trigger Span (Single Action).....	2.5 in.
Warranty.....	Lifetime
Telephone.....	(305) 624-1115
Website.....	www.TaurusUSA.com
Manufactured in/Assembled in.....	Brazil/Brazil

The ambidextrous safeties doubled as a decocker but weren't prone to being accidentally rotated into double-action mode. The slide was locked in place when on Safe. The circular lock in the slide (arrow) was key operated, stalling the slide and the action. The rearward screw on the sight unit controlled elevation. The forward screw was turned to adjust windage. Note the ambidextrous slide-release lever.

Should the trigger be moved without first compressing the integrated safety, a tab (arrow) blocks rearward movement.

Backstrap fit was so well integrated, you may not think to look for extra straps. Precision fit, they weren't tight or difficult to remove.

Backstrap fit was so well integrated, you may not think to look for extra straps. Precision fit, they weren't tight or difficult to remove.
