

FNH USA FNP45 USG NO. 47938 45 ACP, \$780

GUN TESTS GRADE: A-

Its 15+1 round capacity rivaled the highest-capacity 9mm pistols, and we liked the way it handled cocked and locked.

Ambidextrous controls included the magazine release, slide release and safety/decocker levers. The black lever on the frame far left was the takedown latch. The magazine with the rounded base pad held 15 rounds. We chose the alternate back strap with flat profile. The molded checkering proved helpful.

The takedown procedure of our USG pistol was simplest of all. But, with an empty magazine in place and the barrel seated into the locking block we can see the complexity of the FNP design.
