

WINCHESTER 1907 351 WSL, \$500
GUN TESTS GRADE: C

The Winchester was a popular lawman's gun that many of us still find interesting. The Winchester's period look is a hook for some collectors. Although the Winchester originally cost us less than the Remington, in the end the ammunition situation made the Winchester more expensive.

SPECIFICATIONS

Overall Length	37 in.	Length of Pull	13 in.	Action Type.....	Blowback self loading
Barrel Length.....	20 in.	Weight	7.75 lbs.	Magazine.....	Detachable box
Overall Height	3.25 in.	Capacity.....	5 or 10	Stock.....	Wood
		Action	Blued Steel	Trigger Pull Weight	5 to 5.5 lbs.

Bob Campbell prefers the lines of the Winchester Model 1907 over the Remington. A lot of other people liked it, too, since it was manufactured from 1907 to 1957.

Above: The '07's cocking rod has a knurled knob. Right: Once a detachable magazine is locked in place, the shooter presses the knob to the rear, cocking the bolt, below right. While it seems complicated, the rifle is simple to operate.

Triple K Manufacturing offers both 5- and 10-round magazines for this rifle. Triple K's 10-rounder here is attractive and reliable. It required minor adjustments to work. The rifle differs from the Remington Model 8 in that the Winchester is a straight blowback. The bolt recoils off of a fixed barrel, while the bolt, bolt carrier and barrel of the Model 8 recoil together.
