

SMITH & WESSON M&P 9 #209001 9MM, \$679

**GUN TESTS GRADE: A**

Complete with light rail under the muzzle, the S&W M&P 9 was a modern design that captured our hearts. It was simplicity in operation, with nothing there you don't need. It had a decent trigger, clever design, perfect function, and interchangeable grip inserts that all added to the package. The gun had ambi slide releases, not often seen. We thought its accuracy was also pretty good.

The arrow points to a tiny lever which has the sole function of moving the sear so the slide can be removed.

Smith didn't fall down on the rear sight, either. This one gave an excellent sight picture (tritium optional, as on the CZ), and won't cut your hands. It's adjustable for windage.
