

## WALTHER USA PPK VAH38002 380 ACP, \$573

Gun Tests grade: C

Despite very good accuracy and reliability, we didn't like shooting the PPK .380 Auto.

GRIP THICKNESS (MAX) .....	1.0 IN.	TELEPHONE .....	(800) 372-6454
GRIP CIRCUMFERENCE (MAX).....	5.4 IN.	WEBSITE OR EMAIL.....	WWW.WALTHERAMERICA.COM

When firing with two hands, our right-handed shooters had to be careful of their thumb being struck by the decocker lever. Note the relief atop the hammer tang so the shooter can view the loaded-chamber indicator protruding from the rear of the slide.

Wavy lines machined into the top of the slide helped reduce glare. This was one of the classic features that distinguish the PPK from today's guns. The dot in the front sight was painted red.
