

# SAKO 75 FINNLIGHT 308 WIN., \$995 (NIB)

## GUN TESTS GRADE: D

Replaced by the Model 85 line two years ago, there are still plenty of Model 75s available at gun shows and auctions. Should you go hunting for one? We wouldn't.

TELEPHONE (BERETTA USA) ..... (800) 237-3882  
WEBSITE ..... WWW.BERETTAUSA.COM

*That odd-looking stuff where you'd expect checkering (bottom arrow) was a soft, rubbery-feeling compound that gave excellent traction. The pistol grip had a slight palm swell on the right side. Those scope rings (top arrow) are the Sako Optilock system, which worked well. The bolt turned through about 60 degrees. It had three locking lugs, and was smooth in its operation. The Sako had an excellent adjustable trigger. With its stylistic stock and nearly white metalwork, the Sako was striking. Our shoulders also thought the light, hard-kicking, poorly padded Sako was quite striking indeed.*
