

SMITH & WESSON M&P45 109107 45 ACP, \$743

Gun Tests grade: B

The M&P45 shot well enough and was reliable. But there were small complaints that should be easily cured.

We had trouble keeping the takedown lever vertical. When we were ready to remove the slide, it would create a jam and we would have to start over again. Adding a stronger detent might cure this problem.

The ambidextrous thumb safeties are visible from atop the Novak rear sight. Each safety offered a shelf-like paddle on which the shooter could ride with the strong hand thumb.
