

GLOCK MODEL 36 45 ACP, \$550
GUN TESTS GRADE: B

The Glock 36 never stuttered and offers good reliability. For Glock fans, this is the gun, but the rest of us thought that there was a lack of finesse and control compared to the 1911 pistols.

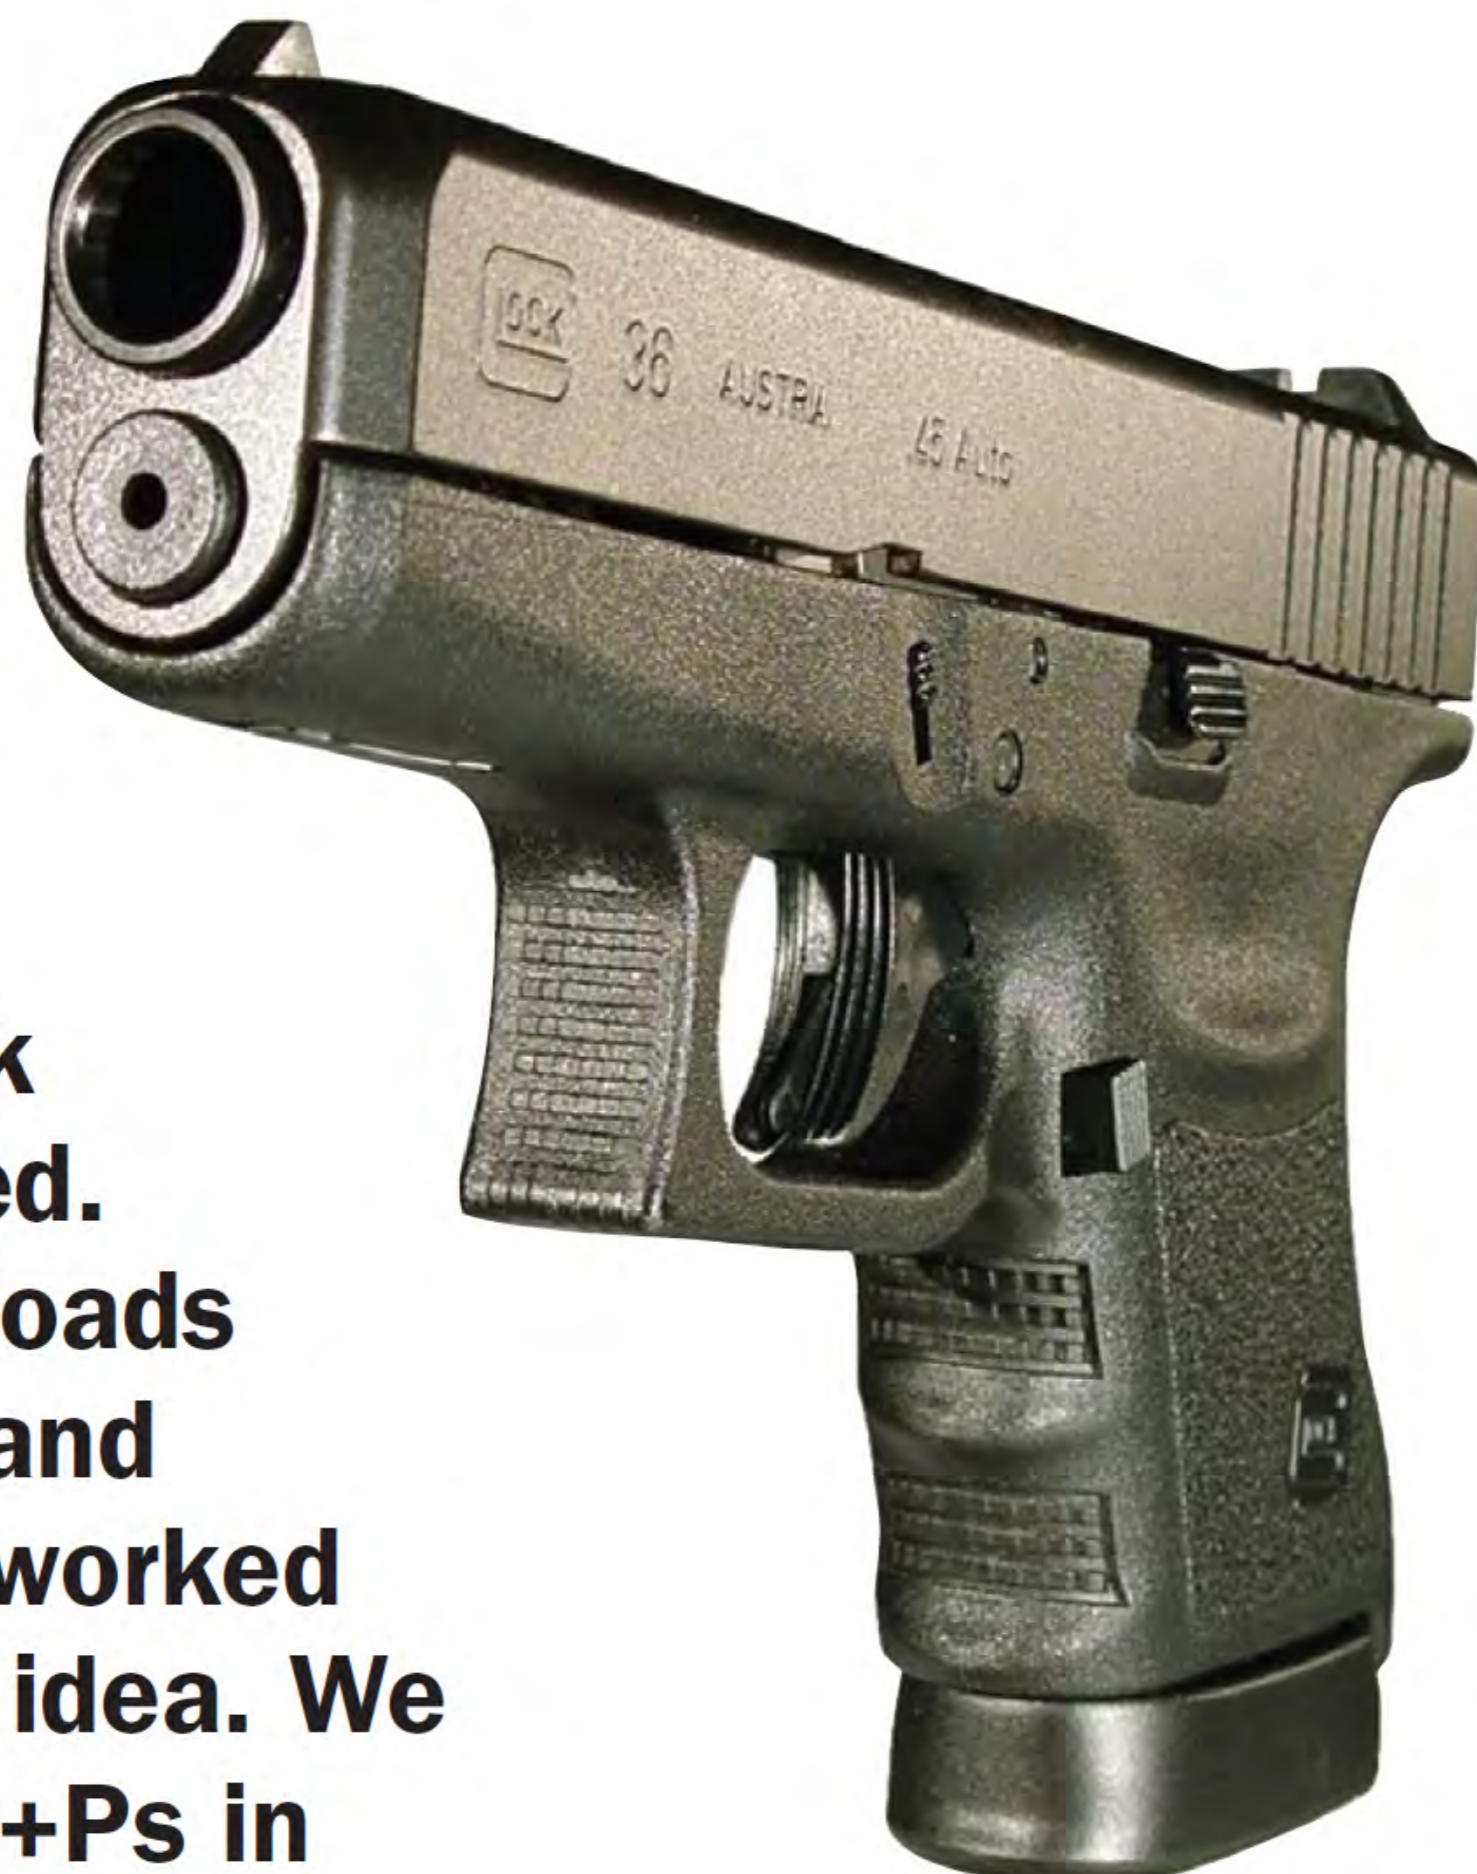

Rock Your Glock offers personalized slide covers for the Glock M 36.

SPECIFICATIONS

Overall Length.....	7.1 in.
Overall Height.....	4.7 in.
Barrel Length.....	3.8 in.
Sight Radius.....	6.2

Trigger Span Single Action.....	2.9 in.
Warranty.....	1 year
Telephone.....	(770) 432-1202
Website.....	www.Glock.com
Manufactured in.....	Austria

In test-firing the Glock, there was nothing unexpected. A caution concerning the Glock is that the chamber of the Glock is largely unsupported. This means that +P loads should not be used, and handloads with well-worked brass are not a wise idea. We are not likely to use +Ps in such light handguns.

The compact 45 is squarely between larger revolvers, such as the 44 Magnum, top, and the 4-inch 1911, bottom. This is a good place to be.
