

## GUN TESTS REPORT CARD

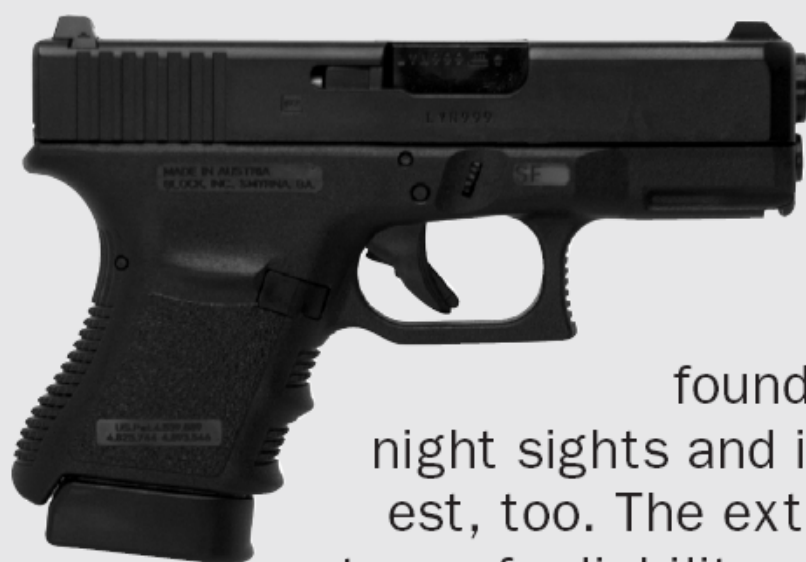

### **Kimber SIS Ultra 45 ACP, \$1316 GUN TESTS GRADE: B+**

This little gun was the most concealable of our trio. It came standard with precision 7-round magazines and excellent night sights. It also had nearly every custom feature you would want. The finish made it snag-free, if not too slippery, under certain conditions. The SIS Ultra is a good concealable match to your full-size 1911.

### **Springfield Armory Loaded Ultra Compact PX9161LP 45 ACP, \$1031 GUN TESTS GRADE: B-**

This is a little big gun. It is concealable, but for some it will bridge the gap between being a backup gun and a primary carry pistol. So-so accuracy and \$1000 price range prevents us from rating it higher, despite its obvious appeal.

### **Glock 30SF 45 ACP, \$687 GUN TESTS GRADE: A-**

If this gun could speak it might say, "What's all the fuss?" The G30SF is one of the easiest-to-shoot 45-caliber pistols we've found, and considering the presence of night sights and its accessory rail, one of the cheapest, too. The extra capacity is there, and so is the type of reliability we demand. Maybe it's a little wide to fit inside the waistband, and some might prefer the addition of a manual safety. But as a package, this is going to be tough to beat.
