

SPRINGFIELD ARMORY LOADED ULTRA COMPACT
PX9161LP 45 ACP, \$1031

Gun Tests grade: B-

This gun was supposed to bridge the gap between backup and primary pistol, but we wanted more accuracy at this price.

The word serration generally refers to the edge of a knife. This overhead shot of the Ultra Compact shows the basis for common pistol terminology such as cocking serrations. Simple and effective, these were lacking on the SIS pistol.

The thin wood grips were great looking and made the Ultra Compact more concealable. But they also provided less control, in our view. Swapping out grip panels to suit one's hands is a simple, yet key, element to accurate shooting.
