

# GUN TESTS VALUE GUIDE: CONCEALABLE 9MM PISTOLS

GUN NAME	ISSUE	GRADE & COMMENTS
<b>Springfield Armory EMP Micro Pistol 9mm P192029LP, \$1253</b>	Feb. 2007	<b>Grade A (Our Pick):</b> If you have small hands, it will fit you better than any other gun we know of.
<b>Taurus PT111 Millennium Pro 9mm, \$445</b>	Dec. 2003	<b>Grade A (Buy It):</b> A good basic gun. In this price range, there aren't many pistols that can compete.
<b>Heckler &amp; Koch P7 PSP 9mm, \$795</b>	Nov. 2007	<b>Grade A:</b> The P7 with its fixed cold hammer forged polygonal barrel was the most accurate pistol in the test.
<b>Sigarms P239 9mm DAK, \$739</b>	April 2007	<b>Grade A-:</b> The P239 frame is a natural for inside-the-waistband carry.
<b>Kimber Aegis II 9mm, \$1195</b>	Feb. 2007	<b>Grade A (Buy It):</b> Great looks, excellent point-and-shoot handling. Slick and snag free.
<b>CZ 2075 Rami P 9mm, \$495</b>	Nov. 2007	<b>Grade B+:</b> Traditional double-action design, but several shooters felt a decocker would be a great improvement.
<b>Glock Model 26 9mm, \$599</b>	April 2007	<b>Grade B:</b> 17/20 shots to the body were on target. But elevating to the B zone, we landed only five of ten hits.
<b>Walther PPS WAP10001 9mm, \$699</b>	Oct. 2008	<b>Grade B:</b> We switched to the 6-round magazine with flush-fitting basepad and malfunctions stopped.
<b>Smith &amp; Wesson SW99 9mm Compact, \$648</b>	Dec. 2003	<b>Grade C-:</b> The SW99 had trouble firing standard 9mm ammunition.
<b>Smith &amp; Wesson M&amp;P Compact 9mm No. 209304, \$656</b>	Feb. 2009	<b>Grade C-:</b> A trip to the factory for repair of the sights failed to fully fix an accuracy problem.
<b>Smith &amp; Wesson M&amp;P Compact 9mm 2009004, \$624</b>	April 2007	<b>Grade D:</b> It suffered repeated malfunctions when the slide would lock back with one round remaining in the magazine.
<b>Ke-Tec PF-9 9mm, \$335</b>	Nov. 2007	<b>Grade F:</b> This pistol had the most felt recoil and was the least accurate—we suspect because of the heavy trigger.
