 Frame Blued Steel
 Barrel Steel
 Slide Blued Steel
 Grip Black Polymer
 Trigger Pull Weight 10.4 lbs.
 Trigger Span 3.3 in.
 Warranty NA
 Made In Serbia

Right: The inside of the Tokarev M70A was relatively straightforward. One trick was a hinged rod within the recoil spring so you can get it back into place. It still wasn't all that easy to do. The insides of the gun were not very well deburred.

Above: This spring clip on the Tok's right side is the key to getting the pistol apart. Press it rearward to free the forward crosspin, and it all comes apart.

Below: The sights on the Tokarev were pretty good. The front was dovetailed into a small raised ramp, and serrations on the slide cut the glare somewhat.
