

KIMBER PRO CARRY HD II 38 SUPER, \$1010

Gun Tests grade: B+

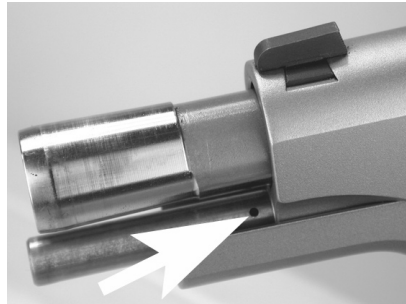

We had to downgrade this underappreciated pistol because we had to tune the recoil spring ourselves. But its performance afterward was A-rated all the way.

SPECIFICATIONS

OVERALL LENGTH	7.7 IN.
BARREL LENGTH.....	4.0 IN.
SIGHT RADIUS.....	5.6 IN.
OVERALL HEIGHT	5.2 IN.
FRONT STRAP HEIGHT.....	2.7 IN.

WEBSITE OR EMAIL.....	WWW.KIMBERAMERICA.COM

The lock-up point for the bull barrel was closest the muzzle. Removing material behind this point made the barrel more nimble as it moved in and out battery. The small hole in the full-length guide rod was for seating the takedown pin used to capture the recoil spring.

Both sights were grooved to reduce glare. They were snag-free and target grade. Blacking the outside of the hammer also helped reduce glare.
