

**SAVAGE 93R17 CLASSIC 17 HMR, \$566**  
**GUN TESTS GRADE: B**

Despite the Savage's deep bluing and attractive checkered stock, we found that this Savage did not shoot as well with its preferred ammunition as did the Henry or the Ruger. That, combined with the magazine, left us awarding the Savage what we feel is a fair-minded and well-supported 'B.'

**SPECIFICATIONS**

OVERALL LENGTH ..... 43.25 IN.  
 BARREL LENGTH/TWIST RATE ..... 24.0 IN., 1:9

 WEBSITE OR EMAIL ..... WWW.SAVAGEARMS.COM

*Above: The Savage had excellent wood-to-metal fit, but its magazine, seen protruding here, was a drawback to our testers. At right is the Ruger. The flush surface of the rotary Ruger magazine gave the gun better lines and a more comfortable shooting surface when the shooter was in the field.*

*The Savage impressed us out of the box as well with an extremely attractive walnut stock, high-luster bluing, and an Accu-Trigger that broke clean at just over 3 pounds.*
