

FNH-USA FNP-9 USG FLAT DARK EARTH (FDE) 9MM, \$599

GUN TESTS GRADE: B+

This gun performed flawlessly with acceptable accuracy. It was comfortable to fire, with crisp controls, and it comes with three magazines. Two things we did not like: the bulky grip and poor sights. FN missed a chance to provide first-class sights on the new pistol.

Above: The FN pistol was designed to secure military and police contracts—it is reliable enough. It has an integrated accessory rail for mounting tactical lights or lasers, a full-length guide rod and flat-coil recoil spring. Textured and checkered frame surfaces enhance operator grip. The FNP-9 USG's barrel is stainless steel, and the stainless steel slide with forward cocking serrations is available with either a matte silver finish or a matte black industrial tool finish for durability.

Above: The FNP-9 USG features DA/SA operation with a manual thumb safety (shown). Its high-capacity polymer frame is offered in a choice of matte black or Flat Dark Earth (FDE) tan. The magazine-release button is reversible.

Above: When you are in a hurry, there is an easy way to clean a pistol—the FN thrived on hot water. Our gun came with three magazines, locking device and lockable fitted hard case. The 47981 and 47982 packages come with the FNP Shooter's Pack, which includes a Blade-Tech molded polymer holster, molded double magazine pouch, and polymer training barrel.
