

TAURUS M94B2UL ULTRA-LITE NINE 22 LR, \$370

Gun Tests grade: F

A previous Taurus Ultra-Lite Nine had been rated as a Best Buy, for many of the same reasons we noted here: it had adjustable and clearly visible sights, it was accurate, and comfortable to shoot. But in this test, our gun refused to cycle properly.

SPECIFICATIONS

GRIP THICKNESS (MAX)	1.1 IN.		
GRIP CIRCUMFERENCE (MAX).....	4.6 IN.		
FRAME.....	GLOSSY BLUED ALUMINUM ALLOY		
BARREL.....	GLOSSY BLUED STEEL		

Problem: The Taurus didn't cycle. In our initial function testing, we would shoot a round, and the cylinder would bind. We would have to open the cylinder, spin it, and snap it back into place, and then continue shooting. All the elements for a good gun are here, if it had worked.
