

REMINGTON 700 CDL SF NO. 84016 7MM REM. MAG., \$1127

GUN TESTS GRADE: B

Operationally, this rifle felt superior, but the Remington didn't lead the pack. LE trainers report this rifle favors heavier bullets.

The X-Mark Pro trigger was superb, offering about 4.7 pounds of resistance as delivered. Pull weight could be reduced by turning the Allen screw located at the top of the trigger (right arrow) counterclockwise. The square-shaped tab (left arrow) located forward of the trigger served as the bolt release.

Above: The stainless action was highlighted by a jeweled bolt. Right: The stock was handsome fore and aft. The buttstock favored the right-handed shooter, however. Remington's new SuperCell recoil pad was a welcome addition.
