Velocity was recorded at 10 feet using an Oehler 35P chronograph with proof channel. Three-shot groups were fired at 100 yards from a machine rest.

The excellent rear sight was the other half of the Springfield's magic that outshot a 36X scope on

the other rifle, with Federal

Match ammo. The narrow front bead is the so-called National Match blade. We liked it, and it sure delivered the goods at 100 yards, giving a best group of half an inch.
