

**SMITH & WESSON M&P9C NO. 209004  
9MM LUGER, \$480**

**GUN TESTS GRADE: A-**

Unlike our test gun in 2009, this piece didn't malfunction, thus its higher grade. The Smith & Wesson subcompact is as slick as possible, with no protruding controls and no manual safety.

**Pistols in the Smith & Wesson Military & Police come with two extra (three total) interchangeable grip inserts to tailor handfit.**

**The slide serrations look almost rakish, and the slide design is appealing, in our opinion.**

Made In	USA

**We preferred the Smith & Wesson disassembly procedure. A captive takedown lever separate from the slide lock just seems better.**

**The Smith & Wesson and a Discreet Defense Solutions holster were a good combination.**
